

**Thanks to funding from Biffaward we are employing Amenity Water Management Ltd to undertake repairs to various structures around Silent Pool in order to improve visitor access and safety.**

**It will be necessary to temporarily close sections of path to ensure visitors' safety. The public footpath past the vineyard will remain open and will provide access to other parts of the site during any path closures.**

**The highly invasive Australian Swamp Stonecrop will also be treated with herbicide and this will result in the appearance of dead plant material. This work is essential to prevent the weed taking over the ponds and to safeguard nearby water bodies.**

**Surrey Wildlife Trust apologise for any inconvenience the works may cause but please be assured the work will improve Silent Pool for both wildlife and visitors.**
