

Nesting Material Holders

You can help birds in spring by gathering nesting materials and putting them up in your garden for the birds to use.

You will need:

- Sticks
- Scissors
- String
- Nesting materials

1. Lash sticks together with wool or string to make a frame
2. Wrap string from one side to the other to make a web
3. Weave nesting materials through the web and hang outside for the birds

Important note: Make sure the nesting materials you choose are safe and suitable for birds to use. If you're not sure about anything, you can email us to ask or just search online and there's lots of advice from experts about what birds like!
