

# Nature Mosaic Dreamcatcher

Hang these beautiful traditional crafts in your room and let the light shine through the beautiful mosaic, they might also help stop bad dreams!

You will need:

- Leaves, petals, feathers, pinecones etc.
- A clear plastic lid
- Scissors
- String
- PVA glue

1. Make one hole in the top of the lid to hang the dreamcatcher from and three holes around the bottom edge of the lid for the dangling strings
2. Cut up your leaves etc into little pieces and stick them onto the lid using PVA glue mixed with a little water to make a pretty mosaic (it looks best if you leave little gaps between the pieces for the light to shine through)
3. Tie three strings to the bottom of the lid and add dangling feathers, pinecones, herbs, whatever you like!
4. Hang it up in a window to see the light shine through and to admire your lovely art!

**Important note:** Be careful making holes in the lid – ask for an adult’s help with this bit and we recommend using a big blob of blue tac behind where you poke the holes through to do it safely.
