

**Do you want to help wildlife on our street?**

Registered Charity No. 208123

Our wildlife is in trouble and I would really like to help...

## **Would you?**

I was thinking of setting up a wildlife gardening group in our road so we could help all sorts of wildlife such as bees and hedgehogs.

There's lots we could do, it's really easy and you don't need to spend any money.

By sharing top tips, seeds or plants we could even make some pollinator pitstops!

### **Top tips**

Just add water! A pond, a tub or just a dish.

Provide plants for pollinators.

Create homes for hedgehogs, birds and bees.

Go pesticide free to protect beneficial species.

Cut a hole in your fence to create a hedgehog highway.

Leave a patch to grow wild for wildlife.

You can find out how wildlife friendly your garden is by taking Surrey Wildlife Trust's wildlife gardening survey at:
